Education

University of Florida, Honors Program—Gainesville, FL

Expected graduation: May 2029

- B.S. Computer Science | Minor: Business Administration | Certificate: Artificial Intelligence Applications
- GPA 3.96, Current courses: Operating Systems, Intro. Software Engineering, Physics with Calculus 1

Skills

- Coding Languages: C++, Python, HTML, JavaScript
- Familiar Softwares: Visual Studio Code, Git/GitHub, CLion, Microsoft Suite
- Personal attributes: Hardworking, High-achieving, Organized, Quick learner, Bilingual (English/Spanish)

Experience

Intern, Florida Museum of Natural History—Gainesville, FL

September 2025-Present

- Developing a full-stack application (using Python, JavaScript, React, Tailwind, DuckDB, APIs) to visualize hundreds of thousands of species' data with machine learning, vector embedding, and LLM semantic search.
- Collaborating with museum colleagues across several semesters to increase biological data accessibility for research and public education through designing visual, user-friendly, and interactive data exploration tools.

Senior Frontend Development Manager, CatchPredict startup—remote position

January 2026-Present

- Leading frontend development for a startup web application using React, Tailwind, and modern state management, delivering monthly feature updates and UI/UX improvements.
- Managing a development team, enforcing code quality standards (PR reviews, testing, linting) and driving execution with consistent on-time delivery.
- Collaborating with backend and product teams to unite data-driven features (ML predictions) into user-friendly interfaces, while proactively identifying and resolving bugs/issues to improve reliability and responsiveness.

International Programs Student Ambassador—University of Florida

September 2026-Present

- Serving as an official student representative for UF Heavener International Programs, promoting global education initiatives through study abroad fairs, info sessions, and Warrington Welcome panels.
- Mentoring prospective study abroad students via email and biweekly office hours, providing personalized guidance on program logistics, cultural adaptation, and intercultural communication.
- Fostering collaborative relationships across the UF campus while strengthening public speaking, leadership, and time management skills.

Intern, GNC Solution—Seoul, South Korea

May 2026-July 2026

- Built a full-stack and deployment-ready ML-powered cryptocurrency trading simulator with an international team, using Django, React, and the Kraken API.
- Designed and implemented a relational database schema and RESTful APIs; built a background service polling live market data; developed an autonomous trading engine using a TensorFlow LSTM neural network.
- Worked independently in a cross-cultural team environment, setting and meeting self-directed milestones to deliver a production-ready project by the internship's end.

Front Desk/Studio Manager/CTO, GRIT60 Fitness—Weston, FL

June 2022-June 2025

- Operated the front desk of a local H.I.I.T. gym, as well as covered customer service, IT, management, scheduling, sales, logistics, Spanish/English translation, and more.
- Appointed the Chief Technology Officer after taking over IT, managing several online systems, and creating digital phone lines to increase company-wide efficiency across all 3 studios.
