Education

Bachelor of Science in Computer Science, GPA 3.94

University of Florida, Honors Program—Graduating May 2029

Courses: Introduction to Software Engineering, Operating Systems, Physics with Calculus 1

Skills

Coding Languages: C++, Python, HTML, JavaScript

Familiar Softwares: Visual Studio Code, Git/GitHub, CLion, Microsoft Suite

Personal attributes: Hardworking, Reliable, High-achieving, Organized, Quick learner

Interpersonal skills: Team leadership, Customer service, Communication, Collaboration

Work Experience

Graphic Designer, Rockwell Health—*June 2025-Present*

- Designing presentations for Annika Rockwell, a Nutritionist and Dietitian with a private health practice.
- Created an organization system for several 100+ proprietary slide decks, allowing for easy and seamless navigation during consultations.
- Implemented this solution across Rockwell Health, increasing efficiency by 600%+.

Front Desk, Studio Manager, and CTO, GRIT60 Fitness Weston—*June 2022-June 2025*

- Operated the front desk at GRIT60 Fitness, a local H.I.I.T. gym, as well as covered customer service, IT, management, scheduling, sales, logistics, Spanish/English translation, and more.
- Appointed the Chief Technology Officer after taking over IT, managing several online systems, and creating digital phone lines to increase company-wide efficiency across all 3 studios.

Founder/Manager, KiraGizmos 3D Printing—*June 2020-May 2025*

- Founded, owned, and managed a 3D printing business on Etsy for 5 years. Produced, packed, and shipped over 250 orders to customers globally, achieving Star Seller status on Etsy (top 5% of sellers) for quick customer responsiveness, 5-star review average over 70+ reviews, and on-time orders.
- Worked with a co-owner/production partner contracted to offload production and increase supply by 30%.
- Donated several hundred dollars in profits to nonprofit organizations.

Projects

Fullstack Development, BioVision Lab at Florida Museum of Natural History—*September 2025-Present*

- Using fullstack development (Python, JavaScript, React, Tailwind, DuckDB, APIs) to visualize hundreds of thousands of species' data with machine learning, vector embedding, and LLM semantic search.
- Developing a stylized, user-friendly web application to increase biological data accessibility for research and public education through visual and interactive webpages, tools, and data displays.

Senior Frontend Development Manager: CatchPredict startup company—*January 2026-Present*

- Leading frontend development for a startup web application using React, Tailwind, and modern state management, delivering monthly feature updates and UI/UX improvements.
- Managing a frontend development team, enforcing code quality standards (PR reviews, testing, linting) and driving execution with consistent on-time delivery.
- Collaborating with backend and product teams to unite data-driven features (ML predictions) into user-friendly interfaces, while proactively identifying and resolving bugs and performance issues to improve reliability and responsiveness.
